2. Most of these articles are not available in the Internet, free of charge
3. Reading such articles **will improve your knowledge** than reading just something from Internet.
4. **Millions of Rupees of public funds** are used to pay for them with the objective of providing a high quality university education for you,
5. Reading and using good quality articles will make you **a more employable / knowledgeable graduate** at the end.

Some problems that you have in reading them

- You may not have time to come to the library because you are busy with lectures.
- You may be too tired to read the journals in the university after your lectures and
